

Summary of Technical Changes

Section	Synopsis	References
840.160	Revised text to relocate listing requirements for cables to Article 800 and added new Informational Note.	FR-8980, SR-7946
840.170	Revised section to delete redundant requirements that are now in Article 800 and corrected cross references.	SR-7984
Chapter 9, Table 1	Revised text to restricting nipple length to 24 inches without connectors.	FR-7580
Chapter 9, Table 4	Added rows and information to Table 4 for 5-inch and 6-inch EMT.	FR-7626
Chapter 9, Table 4 (Article 342)	Revised to correlate with additional trade sizes for IMC, RMC, and EMT.	SR-8183
Chapter 9, Table 13	Added new table to address protection techniques associated with hazardous location wiring, deleted “v” from level of protection, and corrected cross references in table notes.	FR-8648, SR-7698
Annex A	Expanded and updated Annex A product standard information for NEC requirements specifying the use of listed/certified electrical equipment.	FR-8330, FR-8327, FR-8328, FR-8326, FR-8323, FR-8321, SCR-96
Annex C, Tables C.1 and C.1(A)	Revised to add information into the columns for 5-inch and 6-inch EMT.	FR-7842, FR-7843
Annex C, Table C.14	Revised to correct sections and table numbers for multiconductor MC cable.	FR-7644
Annex C, Table C.8	Revised to add information into the columns for 5-inch and 6-inch IMC.	SR-8190
Annex D, Example D1(b)	Revised to replace “largest motor” with “air-conditioner” and corrected cross reference.	FR-9184
Annex D, Example D3	Revised to correlate with changes in TIA-20-6 from “2-wire, 120/240 V” to “2-wire, 120 V”.	FR-9187
Annex D, Examples D5(a) and D5(b)	Removed parentheses under calculations to ensure answer is correct based on mathematical order of operations.	FR-9186, FR-9185
Annex E	Revised text in Type IV construction to address mass and heavy timber construction.	SR-8483
Annex K	Created Informative Annex K to address the increased use of medical equipment in dwellings and residential board-and-care occupancies.	FR-8333, SR-7543
